UNDER MARTIAL LAW

Charges Made Against Authorities
In the Cocur d'Alenes.

Military, It Is Alleged, Could Not
Get Hold of the Body of the Miner
Who Was Killed During the Rioting,
and Substituted Stones—Persecution
and Brutality Practiced,
According to Story of Editor of
Labor Journal.

(Special to The Herald.)
Boise, Ida., June 7.—W. J. Walker,
editor of the Freeman's Labor Journal,
and an organizer for the Western Labor
Union, told a remarkable story concerning
General Merriam and Governor
Stenness' military rule in the
Cocur d'Alene country. Mr. Walker,
being one of the principal leaders in
labor matters in the northwest, is kept
posted on the progress of affairs in the
Cocur d'Alene, and he says he knows
whereof he speaks in the assertions he
makes.

The manner in which things are
done in the Cocur d'Alene under the
pretended authority of martial law is
scandalous, it is worse, it is a
disgrace to the American government," said
Mr. Walker in an interview. "I will tell
you a few things that have been done
under the orders of General Merriam,
which I am assured on the highest
authority are absolutely true.

"I am informed that the inquest held
on the pretended remains of James
Smith, the union miner who was said
to have been killed, was held on a
coffin full of rocks. The military could
not get possession of the body, and
knowing no one dared raise a question
as to what was in the coffin, they filled
it with stones and proceeded to hold
the inquest on the assumption that the
proceedings could stand anyway.

Frightened a Woman.
"During the inquest they went to the
wife of one of the miners in the stock-
ade and made her induce her husband
to give evidence. The woman was in a
delicate condition. They knew she
needed the attention of her husband,
and told her the only way to save her
husband was for him to give evidence
for the government. They told her
they intended to hang at least fifty
men under any circumstances, and
the only way she could save her husband
was by making him tell all he knew.

Thrown Into Stockade.
"In another case a disinterested citizen
was arrested as a witness. He had
seen the man who took part in the
riot, and he was taken to the stockade
and put in with the other prisoners.
The man who took part in the riot
was killed, and his body was thrown
into the stockade. The man who
saw the killing was taken to the
stockade and put in with the other
prisoners. The man who saw the
killing was taken to the stockade and
put in with the other prisoners.

Lives Are In Danger.
"No, just consider the result if a bad
fire should occur. The prisoners would
be shut out, and the stockade would
be a death trap. The soldiers would
be shot to death while trying to save
their lives, for the soldiers would have
orders to shoot down every man who
tried to get out.

INTENSE HEAT CAUSES DEATH

TWENTY-EIGHT FATALITIES IN
NEW YORK YESTERDAY.

Aside From This There Were Thirty-
three Cases of Prostration—In
Other Places.

New York, June 7.—Although the
temperature was several degrees lower
during the latter part of the day, and
a stiff, cooling breeze from the north-
east started up tonight, the record of
fatalities today exceeded by far those
of yesterday in this vicinity. Alto-
gether there were twenty-eight deaths
from the heat in this vicinity. Ten of
these victims were women. Aside from
these there were thirty-three prostra-
tions, the victims of which are still in
the city hospitals, in a more or less
serious condition.

In New York City alone, nineteen
deaths were recorded up to 10 o'clock
tonight, and Hackensack, Newark,
Plainfield, Passaic and Norristown each
reported one death. One of the vic-
tims today was a suicide, who took his
life because of his sufferings from the
heat.

At the beginning of the day the ther-
mometer registered two or three de-
grees above that of yesterday. But as
the day passed the mercury slowly
contracted and the afternoon was
slightly cooler than yesterday. The
wind, which had been shifting during
the day from the south to the north-
west, suddenly took a change and came
from the northwest. The temperature
rapidly fell. Between 8 o'clock and 9
o'clock the thermometer showed a
drop of 12 degrees. At 8:30 the thermometer
registered 73 degrees at the office of the
city bureau of statistics.

The temperature deaths and several
serious prostrations were reported after
midnight.

NO DEATHS AT WASHINGTON.

The Hot Weather, However, Causes
Much Suffering.

Washington, June 7.—The maximum
temperature today was 97, a degree
hotter than yesterday. The city suf-
fered from the heat, but no deaths or
serious prostrations were reported. The
absence of casualties is considered re-
markable.

The general situation has improved
on the north Atlantic coast. There was
a drop of 32 degrees in twenty-four
hours at Boston, and New York re-
ported tonight six degrees colder than
yesterday. On the other hand, the
maximum temperatures reported at
Norfolk and Charlotte were each 93;
Lynchburg, 96, and Nashville and
Chattanooga, each 94.

LONDON HAS A SPELL.

Hot Wave Sweeps Over the City
Causing Distress.

London, June 7.—A heat wave simi-
lar to the one affecting New York, pre-
vails over Europe. Here the contin-
uance of hot weather so early in June
almost breaks all records. The ther-
mometers in this city today reached
97, the highest since the shade at the
day for five days past, and there have
been several deaths from heat.

Eminent French Chemist Comes to
United States.

TREAT SUFFERERS FREE

AMERICAN DOCTORS HAVE
FAITH IN HIS TREATMENT.

Dr. Crotte Has Effected Cures In Over
1,000 Supposed Hopeless Cases—
Appears Before American Medical
Association and Creates a Sensa-
tion—How Patients Are Treated.

Columbus, O., June 7.—At today's ses-
sion of the American Medical associa-
tion, a sensational report was presented
on the cure of consumption by Fran-
cis Crotte, the eminent and widely-
known chemist of Paris, France. Dr.
Crotte has cured more than 1,000 sup-
posed hopeless consumptives, and in
support of his statement he offered to
treat and cure gratis 500 consumptives
from the most infirm states in the Union.
He comes to America with the highest
credentials from the most eminent physi-
cians of the world, and he has already
verified the truth of his statements.

The treatment is very scientific, and
consists of inhalations of formaldehyde
vapors, transported directly through the
tissues by the aid of light-tension static
electricity. He is establishing a sanita-
rium at Pekin, Ill., and clinics at
New York, Chicago and Los Angeles.

Much interest was manifested in the
report, and many of the physicians im-
mediately took pains to interview Dr.
Crotte more closely on his discovery. A
number of eminent physicians have
expressed the opinion that an absolute
cure for tuberculosis had at last been

body, and this evening the shrunken
retained the members of the associa-

COLORED RIVER OVER BANKS

WATERSPOUT TURNS IT INTO A
RAGING TORRENT.

Houses Swept Away and Great Dam-
age Done to Crops and Farms
Along River Front.

St. Louis, Mo., June 7.—A special to
the Republic from Austin, Tex., says:
As a result of the terrible waterspout
and exceedingly heavy rains of last
night on the upper watersheds, the
Colorado river is tonight raging out of
its banks. Reports from Marble Falls
and Llano, thirty miles above, show a
twenty-foot rise there, doing great
damage to property all along the river.
All day long the torrent rose, and
tonight debris is pouring down the river
by the carload. Several houses, which
have been swept from their insecure
moorings along the river front, are
seen floating far out in the stream,
though the inmates have, evidently, es-
caped, as there is no sign of life about
the cottages. There is great damage
reported to crops and farms along the
river front.

The water began to rise here about
1 o'clock this afternoon, and by night
had gone up twelve feet, and still is ris-
ing. The great wall of water, which is
at this place in imminent danger of
being washed away. The water is
pouring over the great 1,300-foot dam
spanning the river, in a solid sheet
of mud and debris twelve feet deep,
and roaring so as to be heard several
miles away. The city, which is in-
censed at the foot of the range of moun-
tains, this big flood is rapidly forcing
its way into the lowlands, submerging
the fields and gardens, and threatening
the safety of the people living in close
proximity to the river. Work has been
done on down the river to the people
to take to the hills.
